FULL STACK ENGINEER | MERN & AI INTEGRATIONS

Results-oriented **Software Engineer** with over **1 year of production experience** in **Full-Stack Web Development (MERN) and AI**. Proven track record in building scalable SaaS-like applications, managing server deployments, and leading technical teams. Skilled in **Next.js**, **Node.js**, and **AI integration**, with a focus on writing clean, maintainable code. Remote-ready and eager to contribute to impactful engineering teams.

SKILLS AND EXPERTISE

Core Stack (MERN) :- MongoDB, Express.js, React.js, Node.js (ES5 & ES6)

Languages :- Python, JavaScript (TypeScript), JQuery, Java, C/C++, HTML/CSS

Web Technologies :- Next.js, Tailwind CSS, REST APIs, Redux/State Management

Backend & Database :- MySQL, MongoDB, RDBMS, Server Management, Deployment

Tools & Testing :- Git/GitHub, Postman, Jest, VS Code

PROFESSIONAL EXPERIENCE

PENTAPOLIS FOUNDATION | Kolkata, India (Remote/Hybrid)
Graduate Engineer Trainee-(Full Stack Team Lead)

June 2025 - Present

At Pentapolis Foundation, I serve as the **Team Lead** of the Kolkata Center Technical Team, managing a group of four members and overseeing the full cycle of web development projects from planning and design to deployment and optimization.

Accomplishments:

- Directed the **Full-Stack Web Development** lifecycle for a **4-member** technical team, providing **technical support and guidance** to ensure high-quality code standards and seamless project delivery.
- Engineered modular applications using **React.js** and **TypeScript**, creating responsive dashboards for volunteer management and CSR activities.
- Optimized frontend performance by **40%** through code splitting and asset optimization, and ensured cross-browser compatibility and responsive design across all devices.
- Managed **production server** resources and implemented strict code quality standards via regular code reviews.

PENTAPOLIS FOUNDATION | Kolkata, India
Internship-Management Trainee (Technical Lead)

December 2024 - March 2025

Accomplishments:

- Spearheaded the **7-member** Kolkata Center Technical Intern Team, managing the design, development, and smooth execution of all IT-related operations and web projects.
- Successfully **deployed and managed full-stack** web applications on cPanel, configuring domain routing, SSL certificates, and **6 subdomain management** for all organizational portals.
- Managed and optimized **MySQL databases** and server configurations, identifying bottlenecks to ensure **99.9%** uptime for organizational portals.

Subject Matter Expert (Java/Programming)

Accomplishments:

- Authored a comprehensive question bank of **100+ programming problems** (Java), categorizing them by difficulty (Basic, Medium, Hard) to assess both conceptual clarity and coding proficiency.
 - Designed targeted assessment questions covering **6 core programming areas**, including OOP, data structures, exception handling, multithreading, collections, and file I/O.
 - Collaborated with a **remote team of 5 SMEs** to review and validate the technical accuracy, difficulty balance, and solution quality for the entire question set.
-

PROJECTS

Automated Developer Workflow Orchestrator (MERN + AI)[Project Link](#)**Tech Stack:** MongoDB, Express, React, Node.js, Google Gemini Flash

Accomplishments:

- Architected an automated code analysis engine using the **MERN stack** and **Google Gemini Flash**, achieving **sub-2s response times** for complex logic reviews.
- Developed an **Agentic Workflow** using Google Gemini Flash, engineering a 'Senior Code Reviewer' agent that automates code quality checks, achieving a **40%** increase in review relevance, and covering **7 key metrics** including performance, security (SQLi/XSS), and SOLID principles.
- Enhanced developer experience (**DX**) by **50%** via a React frontend featuring PrismJS syntax highlighting and real-time Markdown rendering for structured, GitHub-style feedback.

EcoConnect – A MERN-Based Social Commerce Platform for Sustainable & Recycled Products**Tech Stack:** MERN Stack (MongoDB, Express, React, Node), REST APIs

Accomplishments:

- Built EcoConnect, a full-stack MERN social-commerce platform enabling users to buy/sell 100% eco-friendly recycled products, featuring a responsive React UI that improved browsing efficiency by **40%** and a secure Node.js–Express REST API achieving **95%** faster request handling.
 - Designed a scalable MongoDB architecture supporting **10,000+** product listings, integrated smart product comparison reducing decision time by **35%**, and added real-time features (likes, comments, follows) that boosted user engagement by **60%** and retention by **30%**.
 - Developed a community-driven sustainability ecosystem with educational content, user-generated posts, and eco-tips that encouraged mindful consumption and helped users reduce environmental impact by up to **20%**.
-

EDUCATION

B-Tech in Computer Science And Engineering

NSHM Knowledge Campus, Durgapur | 2021 – 2025

CBSE Higher Secondary Education (Science)

Burdwan Model School | 2021

CISCE Secondary Education

Bidhan School, Durgapur | 2019
